User Feedback for your Prototype

Show your prototype (version 1.0) to users (use the same user selection) and get their feedback. You can improve your prototype and create a prototype (version 2.0)

Lakshan S.N.
IT21800900

Task 01:

- Greet the participant and thank them for their time.

- "Imagine you are a regular user of our application. I'll guide you through a few tasks as if you are exploring the app on your own."
- "Can you please navigate through the dashboard and tell me your thoughts on how easy or difficult it is to find key features?"
- "Now, can you find the 'Get Certification' button and tell me where you would expect to find this feature?"
- "Can you locate the 'Download Data' button? How would you prefer to access the download option while using the dashboard?"
- "What do you think about the overall look and feel of the prototype?"

- Specific feedback on changes requested:

  "Earlier, you mentioned the 'Get Certification' button placement and the chart size. Can you explain what changes would make them more intuitive or useful?"

- Finalize

  "We'll use your feedback to improve the prototype, and you'll have a chance to see the updated version soon."
